Licenses

- General, Electrical & AC Contractor in Florida
- Electrical Contractor in Virginia
- Professional Engineer in Florida, Maryland, and Virginia

NAICS Codes

- 236220 Commercial and Institutional Building Construction
- 238210 Electrical/Wiring Contractors
- 238220 Plumbing, Heating, and Air-Conditioning Contractors
- 561210 Facilities Support Services
- 561621 Security Systems Services (Except Locksmiths)
- 811310 Machinery & Equipment Repair & Maintenance
- 221320 Water Supply and Irrigation Systems

Bonding

Single Job: \$4.5M; Aggregate: \$6M

Core Competencies

Goast-CE JV1 LLC delivers innovative and differentiating solutions for the most challenging facility mission objectives. We design, engineer, construct, and maintain every element of facilities and structures, combining electrical, mechanical, and civil work to support both defense and civilian agencies.

Construction (General and Specialty) and Repair

- Engineer and construct critical infrastructure
- Full-scope new construction and renovations
- Electrical, mechanical, and security system integration

Maintenance and Facility Support

- Full-service mechanical and electrical systems maintenance
- Preventive maintenance programs
- Emergency response and troubleshooting

Differentiators

- Seamless Self-Perform: in-field, on-wing, in-house.
- One-Stop-Shop: Design, develop, produce, validate, qualify, certify, manufacture, deploy, sustain, service, and update with appropriate certifications and licenses.
- Fast Response: for emergencies, within 2–12 hours, and non-emergencies, within 24–48 hours

Performance Showcase

Construction & Repair

- Army MICC Fort Belvoir (#W91QV120R0144, past) -- Specialized teams safely abated asbestos, adhering to strict protocols to prevent exposure. The project transitioned smoothly into restoration while maintaining SCIF accreditation.
- National Park Services (#140P5422C0018, past) -- This project replaced aging asbestos-cement pipes with durable HDPE in Everglades National Park, improving water reliability and safety. CE employed advanced engineering and eco-friendly practices to ensure sustainability with minimal environmental impact.

Maintenance and Facility Support

- Keesler Hospital HVAC Controls (FSI/Prime, ongoing) Provides technical support, remote diagnostics, and access to an engineer for troubleshooting on-site maintenance, calibrating devices, and implementing programming modifications since 2017.
